Date

To Whom It May Concern:

This letter is to confirm that «First\_Name» «Last\_Name» is carrying a medication that is contained in glass vials. Along with the medication, there are syringes and needles to allow appropriate administration on a daily basis. To prevent loss or damage, this medication must be carried on board the flight.

Withholding this medication or injection supplies could place a patient's life in jeopardy. For purposes of comparison, it is as if insulin vials were withheld from a person with diabetes.

Thank you, in advance, for your cooperation. I am available to be contacted at (604) 806-8855 should you require any further information in this regard.

Sincerely;

Team member signature.
